PROFESSIONAL SUMMARY

Full Stack Software Developer with 4+ years of experience designing, building, and delivering scalable web applications and enterprise BI platforms using Python, Django, FastAPI, and REST APIs. Proven ability to automate reporting workflows, integrate cloud storage, and translate complex business data into actionable dashboards. Adept at owning features end-to-end across backend, frontend, and cloud infrastructure.

PROFESSIONAL EXPERIENCE

Software Developer — Leapsurge Business Innovations

05/2024 – Present

Bangalore, Karnataka

- Design and maintain scalable web applications using Python, Django, FastAPI, React, Next.js, and REST APIs for enterprise clients.
- Built Aspire BI end-to-end: developed the complete frontend in React and the complete backend in FastAPI, converting complex enterprise data into interactive dashboards.
- Engineered the MILE module to programmatically fetch Power BI dashboards page-by-page and auto-generate PPT/PDF reports.
- Wrote and optimized SQL queries across MSSQL and Databricks SQL to support reporting and analytics workflows.
- Automated end-to-end report scheduling, email delivery, and Azure Blob Storage integration, eliminating manual report distribution.
- Hosted and managed multi-tenant applications on Azure, separating Azure DevOps (CI/CD) and App Service hosting across distinct tenants.
- Developed a Master Data Management (MDM) platform supporting Excel/CSV ingestion and direct database inspection.

Python Developer — Jic IT Solutions Pvt Ltd

02/2023 – 05/2024

Kochi, Kerala

- Built and maintained web applications using Python, Django, Celery, REST APIs, and JavaScript.
- Implemented backend services, authentication systems, and database management layers.
- Optimized code performance and contributed to peer code reviews to improve overall code quality.

Python Full Stack Developer Intern — Luminar Technolab Pvt Ltd

07/2022 – 01/2023

Kochi, Kerala

- Developed responsive user interfaces using HTML5, CSS, and JavaScript.
- Built REST APIs and integrated frontend components with Django backend services.
- Gained hands-on experience with Git/GitHub version control workflows.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, FastAPI, Flask, JavaScript, TypeScript, React, Next.js

Web Technologies: HTML5, CSS3, Bootstrap

Databases: PostgreSQL, MySQL, MSSQL, MongoDB, Redis

Tools & Platforms: Git, Celery, REST APIs, AWS, Azure, Azure DevOps, Azure App Service, Databricks

Languages: English, Hindi, Malayalam, Tamil

KEY PROJECTS

LIA — Conversational AI Assistant

- Built a conversational AI assistant integrating Claude and GPT-5 for natural language business queries.
- Connected the assistant to Azure Databricks for real-time retrieval of sales, stock, and operational data.

AspireBI — Enterprise BI Platform

- Developed the complete frontend in React and the complete backend in FastAPI for an enterprise BI platform.
- Built the MILE module to fetch and combine multi-page Power BI dashboards into unified reports.

- Wrote SQL queries in MSSQL and Databricks SQL to power reporting and analytics features.
- Automated PPT/PDF export and email delivery to stakeholders; integrated Azure Blob Storage and SharePoint for secure storage and sharing.
- Deployed and hosted the multi-tenant application on Azure, with Azure DevOps CI/CD in one tenant and App Service hosting in a separate tenant.

LeapsurgeBI — Business Analytics Application

- Developed backend features using Python, Django, and REST APIs for a data-driven analytics platform (leapsurgebi.com).

Master Data Management (MDM)

- Built Excel/CSV ingestion and export functionality for enterprise dataset preparation and reporting.
- Developed interfaces for viewing database tables and inspecting stored records.

BestBI — Business Analytics Application for SMBs

- Contributed to a BI solution for small and medium businesses with integrated cloud storage and mobile access (bestbi.com).

Bansal TMT Points — Loyalty Management App

- Built a loyalty management application for TMT steel orders and points tracking using Django, DRF, and Simple JWT authentication.

Flyworld — OTA Website

- Contributed to an online travel platform enabling hotel and flight bookings using Django, REST APIs, HTML5, CSS, and JavaScript.

Votecast — Voter Management Tool

- Built a tool enabling political parties to filter voters and calculate election probabilities.

EDUCATION

Bachelor in Computer Applications, Jain University

Karnataka

01/2026 – Present

Diploma in Computer Engineering, MGM Polytechnic College

Trivandrum, Kerala

2018 – 2021

CERTIFICATIONS

- Python Web Development Expert — NACTET
- Certificate of Internship on Android
- PowerBI Workshop Certificate
